THE RAISE

Round. \$3M pre-seed at a \$10M pre-money, opened July 1, 2026.

Commitments. Roughly \$500K in LOIs and soft commitments, about \$70K received to date.

Structure. Incorporation, the BC tax-credit eligibility, and subscription documents are in progress and nearly complete.

THE STRATEGY

The wedge. The cash leg, a tokenized bank deposit, settling delivery-versus-payment with legal finality.

The MVP. Connect institutions first, then pull in tokenization projects that need our rails.

The build-up. Revenue from partners funds our own development team, tokenization engine, and smart-contract work.

Living document. Update the figures and status as they change; the live tracker is the Path to Revenue in the data room.
